PAEDIATRICA INDONESIANA VOL. 8 No. 1, 2, 3, 4, 5, 6 (1968)
SUBJECT INDEX

A case of Chronic Intussusception (Emil Jahja and Sjamsir Daili) 129.

A case of Giant Cell Transformation with Biliary Tract Atresia (Donhuysen — Goei Giok Hwa and Topo Harsono) 64.

An Unusual Solid Teratoma of the Ovary with Implantation Metastases of Histologically Benign Neuroglial Tissue in the Abdominal Cavity (Ie Njoek San, Tjo Tjiang Hian, A. Azis, Ibnoe I. Djojosoebroto and Sarjono) 161.

Biological Value of Viobin Fish Protein Concentrate (Goan-Hong Lie, Oey Kam Nio and Dradjat D. Prawiranegara) 61.

Blended Food Product — Formula No. 2 (Goan- Hong Lie, Kam- Nio Oey and Dradjat D. Prawiranegara) 251.

Congenital Adrenal Hyperplasia due to C 21 Hydroxylase Defect (L.H. Oen, S. Kuntariah and H. Abdillah) 154.

Congenital Porencephaly (Nastiti N. Rahaju, Suharjono and Tjan Toan Giap) 70.

Diarrhea in children between the Age of 0 - 2 years in Bandung (Ono Dewanoto, A. Alisjahbana, Suratman Erwin and Sugiri) 45.

"Djengkol" intoxication in children (Suharjono and Sadatun) 20.

"Early" versus "Late Feeding" in Prematures (Aswitha Damayanti) 260.

Gammaglobulin Levels of Healthy Infants in Jakarta (Suharjono, Sutedjo. T.B.S. Pelenkahu, Sri Muljani Darmawan and Rachma F. Budjang) 175.

Health, Development, and Nutritional Survey of Preschool Children in Central Java (Liem Tjay Tie, Oey Khoen Lian, Thio Wie Liong — Ong and Catharine S. Rose) 203.

Health Services for children in Isolated Areas (Thomas Stapleton) 87.

Hyaline Membrane Disease of the Lungs (Loe Sioe Thoen, Pitono Soeparto, Muljono Djojopranoto and Iskaq Darsono) 123.

Influence of Early Malnutrition on Some Aspects of the Health of School — Age children (Lauw Tjin Giok, Catharine S., Rose and Paul György) 95.

Intestinal parasites in infants and children in Medan, North Sumatra, Indonesia. (Jo Kian Tjay and Kwo Ek Hoa) 6.

Low Protein Content in Infant Formulas (Te Bek Siang, Samsudin and E.M. Halimoen) 82.

Microbiological, Parasitic and Epidemiological Considerations of Infantile Diarrheal Disease in Bandung, Indonesia (Soeprapti Thaib, Nafsiah and Mien Roemini) 133.

Morbidity in outpatients attending the Department of Child Health, Medical School, University of Indonesia, Dr. Tjipto Mangunkusumo General Hospital Jakarta Sutedjo, Mohamad Sugiono, K. Rohtiatmo and Sudijanto) 235.

Nutritional problems in Indonesia (Sutedjo) 255.

Ocular involvement in acute leukemia (Suharjono, A.H. Markum, Iskandar Wahidijat, Sriwening R. Saidi and Slamet Setioso) 40.

Oral Immunization against Poliomyelitis in Jakarta (Sutedjo, Suprapti Thaib, S. Harmanses, Suharjono, Sudijanto, A. Azis and Retno Trenggonowati) 185.

Postgraduate Pediatric Training in Indonesia (Sutedjo) 172.

Red Palm Oil in the Prevention of Vitamin A Deficiency. A Trial on Preschool

Children in Indonesia (Oey Khoen Lian, Liem Tjay Tie, Catharine S. Rose, Dradjat D. Prawiranegara and Paul György) 192.

Sarcoma Botryoides (Ie Njoek San and Oey Han Beng) 30.

Social Paediatrics Present and Future (Bratelj S.Z.) 91.

The Histopathological Aspects of the Spleen in Splenomegaly (Muljono Djojopranoto, Oen Sian Djien and Ong Sing Khing) 221.

The Protein Efficiency Ratio (P.E.R.) of Fish flour made from fish preparations as commonly consumed in Indonesia (Aziz, Johana — Tan Tjoan Nio and A. Djaeni S.) 1.

Treatment of Purulent Meningitis with Intravenous Ampicillin (Sutedjo, B. Ginting Munthe, Aswitha D.Z. and M. Hardjono Abdoerrachman) 181.

Tuberculosis of the Mastoid (Suharjono, Sunoto, Sigit, O.A. Tadjuddin and Nurbaiti Iskandar) 148.

Tuberous Sclerosis (Muljono Djojopranoto, Ong Sing Khing, Kwee Hok Gie and Ting Giok Gwan) 110.

Village Social Development Organisation in Indonesia ("Lembaga Sosial Desa") (M. Sugiono) 76.

INTERNATIONALLY RENOWED

Antifungal and Antiprotozoal Antibiotic

TRICHOMYCIN

1. TRICHOMYCIN is a new antibiotic obtained from cultures of an actinomycete, *Streptomyces hachijoensis*, isolated from a soil sample in the Island of Hachijo by the late Prof. S. Hosoya of Tokyo University and his collaborators.

2. TRICHOMYCIN is possessed of a *potent antibiotic activity against fungi* including *Candida albicans* and Trichophyton, and *protozoan parasites trichomonads* and dysentery ameba.

3. TRICHOMYCIN has been clinically proved to be quite effective in controlling fungus infections (vaginal candidiasis, urinary candidiasis, dermatomycoses, bronchopulmonary candidiasis, thrush etc.), trichomonal infections (trichomonal vaginitis and cystitis), and amebic dysentery.
